

When the World Feels Like Too Much, Wear the Calm.

Fidget-Wear™ Brings Wearable Self-Regulation to The Inspired Home Show 2026

Patent-protected apparel with built-in tools for self-soothing, calming anxious energy, and emotional regulation — for everyone, every day

CHICAGO, IL — We all have moments when the world feels like too much. A racing mind before a big presentation. The overwhelm of a crowded room. The anxiety that creeps in and won't let go. For millions of people, finding a way to quietly self-regulate, self-soothe, and calm that anxious energy is a daily necessity — not a luxury.

Fidget-Wear™ LLC has built that necessity directly into clothing. Debuting in the **Inventors Corner** at The Inspired Home Show 2026 — March 10–12 at McCormick Place in Chicago — Fidget-Wear's patent-protected apparel is intentionally designed to help you quietly ground yourself, release tension, and find calm — without anyone around you knowing.

For anyone navigating ADHD, anxiety, autism, sensory processing differences, PTSD, or simply the stress of everyday life, Fidget-Wear offers something rare: a **wearable tool for emotional regulation** that goes wherever you go. No gadget to pull out. No explanation to give. Just comfort, built in.

“Every single one of us has moments where we need to regulate, soothe, or just quietly cope. Fidget-Wear gives you that tool — discreetly, comfortably, and without judgment — whether you're 8 or 80.” — Emily, Founder, Fidget-Wear™

Fidget-Wear was founded by Emily, a mother of three boys whose school provided fidgets to help them focus. The problem? The fidget toys were constantly getting confiscated, misplaced, or simply weren't on hand in the moment her boys needed them most. Emily did what so many frustrated parents do when the solution they need simply doesn't exist — she started building it.

Stop by the Inventors Corner to try one on, meet Emily, and find out why Fidget-Wear is one of those products you'll immediately think of someone who needs it.
