PRESERVIO INTRODUCES PRECISION-PRESSURE WINE & FOOD PRESERVATION  
SYSTEMS AT  
THE INSPIRED HOME SHOW 2026

ROSEMONT, ILL. (March 10, 2026)—Preservio, an emerging home + housewares brand, will showcase its precision-pressure preservation systems designed to keep wine fresh for weeks and help food stay fresher for 5x longer at The Inspired Home Show 2026, March 10–12, at McCormick Place in Chicago, Ill.

Preservio’s flagship wine preservation system delivers a consistent seal through precision pressure control and a reusable silicone stopper engineered for long-lasting airtight performance. The product has already been market-validated through crowdfunding, shipped to paying customers, and earned strong consumer feedback—many reviews highlighting that Preservio is the first solution they’ve tried that reliably keeps opened wine tasting fresh over time.

Preservio will also highlight its food preservation line: airtight, pressure-assisted storage designed for meal prep, leftovers, and pantry organization. Built for repeat use, the system supports freshness and helps reduce household food waste—paired with a clean, retail-ready aesthetic and bundle configurations that merchandise well in store and online.

“We built Preservio to make preserving freshness effortless and reliable,” said Nicola Yu, founder of Preservio. “Customers have told us they’ve tried multiple options before—and Preservio is the one they actually keep using. That kind of repeatable, ‘it finally works’ experience is exactly what drives word-of-mouth and retail sell-through.”

Preservio will exhibit in Inventors Corner at The Inspired Home Show 2026. Buyers, media, and partners are invited to stop by for live demos and to discuss retail-ready assortments, pricing tiers, and merchandising options.
