Drinkmate, the ANY Beverage Carbonation Maker, to Participate in 2023 Inspired Home Show
Attendees are Invited to Meet with Company Representatives at Booth L12708

Ann Arbor, MI – February 2023 – Drinkmate, the most versatile home beverage carbonator, today announced their participation in the [2023 Inspired Home Show](#). Drinkmate will be exhibiting in booth L12708 at the Inspired Home Show held at McCormick Place in Chicago from March 4-7, 2023.

The Inspired Home Show is the leading Home + Housewares show in the United States. Covering all markets addressing the

home and houseware business, The Inspired Home Show attracts buyers and suppliers from all over the world.

Drinkmate’s proprietary CO2 Fizz Infuser technology allows the consumer to carbonate any cold beverage safely and quickly. It accomplishes the consumer demand for more wholesome beverages by empowering users to control what goes into their drinks. Drinkmate is the first and most versatile at-home device that can carbonate any beverage, including wine, iced tea or coffee, juices, cocktails and can even refresh sodas or beer that lost their bubbles. Direct carbonation of drinks preserves their full flavor and fizz, compared to diluting the beverage by mixing it with soda water. Of course, Drinkmate carbonates water as well.

“We are excited to be returning to the Inspired Home Show again this year,” said Douglas Wang, Chief Executive Officer of Drinkmate. The 2022 show was great for us, helping us achieve double digit sales growth for the year, and we’re delighted to be back. We have been actively expanding our brand throughout North America, and other international markets, and are looking forward to networking with the industry to share the advances we have made to the Drinkmate product line and brand. At the show, we will be debuting the innovative Drinkmate LUX model, which elevates the home carbonation experience with an attractive stainless steel design. We invite Inspired Home attendees and our channel partners to visit us at booth L12708.”
