

Garbage Bin Locking Device

Snap-on, stretch and lock | Easy. Clean. Convenient.

BinClaw's development arose from the experience of having to pick up food garbage from all over our neighbour's yards after the raccoons got into the bins. After the realization that existing critter-proofing solutions were flawed, each in its own way, the effort to develop a better, user-friendly, bin-securing device began. BinClaw evolved in many ways before arriving at its finished form. Now it provides users with a way to secure their bins tightly with confidence and convenience.

Ditch the Mess, Embrace the Claw: BinClaw Saves the Day!

Snap & Go	No tools, no fuss, just secure your bin in seconds. Leave the DIY struggles behind!
One-Handed Use	Toss your trash while BinClaw keeps the lid shut, making multitasking a breeze.
Fully adjustable strap	Expands or stretches to most bin sizes
Patented handle	Fits most available bins
Pick-Up Day? No Problem	Stow BinClaw conveniently on the wheel axle or bin bottom, ready for action.
Tool-free installation	Ditch the screwdriver, snap it on in seconds and reclaim your precious time.
Universal fit	Fits most garbage or recycling bins
Lift & Lock with the Claw	The patented handle locks the bin AND lifts the lid. Keeping your hands totally clean.
Built to last	Rest assured, BinClaw is tough enough for raccoons

Secure your bins in four easy steps!

Position rear clip over lid hinge at desired location and snap-on

Stretch front clasp and hook against the front apron or lip of the bin

Use the clasp to lock the bin and lift the lid!

Stow BinClaw on pick up day by stretching the front clasp and hook onto the wheel axle of the bin

Specifications
