Hands-Free Slow Juicer

AUTO10

Hands-Free Slow Juicer AUTO10

Discover a new way of juicing with AUTO10. Its auto-hopper design makes juicing a hands-free process. Load the juicer, turn it on, and walk away. The result is a large batch of nutritious, cold-pressed juice. Offering convenience and efficiency, AUTO10 transforms your juicing experience.

Automatic Cutting Technology

The upper double-crushing blade is designed to automatically cut whole ingredients and feed them to the juicing chamber.

Multiple Juicing Capabilities

AUTO10 can effectively process and extract juice from a variety of ingredients, accommodating soft fruits, leafy greens, root vegetables, and hard ingredients with ease.

100oz (3L) Auto Hopper

The 100oz hopper is designed to pre-load with a large quantity of ingredients, increasing the yield produced at one time. The auto hopper cuts and self-feeds ingredients to reduce preparation time and manual feeding.

Safety Locking Feature

The juicer only operates when the auto hopper and juicing bowl are securely in place, providing a safer juicing experience.

Cold-Press Technology

The heavy screw gently presses and crushes ingredients without generating heat, resulting in a longer-lasting juice with better flavor and more nutrients.

Powerful Noise Reduction Motor

The heavy-duty 240W motor offers a long operation time, making it perfect for large-batch juicing without the concern of overheating. Its noise reduction feature ensures a quiet juicing environment.
