LOOK BOOK**

# LE PICARDIE®

**NEW**  
**PINK BLUSH**  
The color of the year

Duralex® expands its offer with  
an eighth mass tinted colour!  
Always being more trendy,  
always on the right path.

Blush is a soft, fresh pink color, perfect for Spring and Summer tables and alfresco dining.

Consumers can have fun mixing and matching the new Blush color with the Amber, Green, Marine, and Plum colors. The glass is dyed, or colored, during the manufacturing process so the color is part of the glass. The color is not sprayed on. The colored glass will remain beautiful for the life of the glass, never fading. The Picardie tempered glasses are suitable for hot or cold drinks and conveniently stackable. They are also microwave and dishwasher safe, impact and chip resistant, extremely durable and the perfect weight. A set of 4 Picardie Pink Blush tumblers retails for \$22.

# THE ICONIC

tumbler Le Gigogne® is growing

The oldest Durablex® design is rejuvenated with a new capacity to satisfy the new usages.

Durablex launches a new size of the iconic Gigogne Glass.

The 12-ounce size is great for tall drinks like iced tea, cocktails, juice, and so much more. It also serves as a bowl for cereal, a vessel for yogurt parfaits and a vase for flowers. Its shape is easy to handle, even by children, which has long made it the star of canteens and schools in France for many years. For nearly 80 years, the 7 3/8 oz model has been the ambassador of French glass making. The set of 6 glasses retails for \$36.

# NEW 2024

A color statement for your table.

Our new Versailles Mug offers a range of colors from soft to bold.

The 8 ¾ ounce mug is perfect for any hot or cold beverages.

Microwave and dishwasher safe.

Add color to your table!
