

LOOK BOOK 2024

Morocco: Eccentric and vivid colors combined with traditional textures create Morocco. Style that reflects the mystical soul of the Orient's bright colors, patterns, and gold detail.

Botanical: Origin of Nature: Botanical is an exquisite collection bringing wildflowers of the countryside to life. The wild iris, lavender and butterfly bush patterns provide a feast of nature on your dinner tables.

Palms: Art Deco Reflected on the Table... the Palms Collection combines beautiful rich palm leaves with dramatic art deco geometrics. The collection is made from a proprietary Alumilite porcelain formula that gives the dinnerware high mechanical strength, while maintaining a slim and lightweight profile.

Wild Life: Pop-Art Touches. The Wild Life Collection creates stunning effects in your living spaces thanks to its pop-art style, colorful patterns, and animal motifs. Let the doors of the wild open with giraffes, elephants, monkeys, and zebras!

COPPER LINE

Copper Line:

The trend of copper meets minimalist design in the Copper Line, an exquisite dinnerware alternative for those who want to revive their tabletop with the handcrafted elegance of copper. Although the collection is refined with a luxurious copper rim on each piece, the pieces are strong.

Re-Gen Bird Song

This rich pattern of Porcelain Dinnerware is made from 100% Recycled Material. Porland has created a series of fully recycled dinnerware collections called Re-Gen. The Company invented Re-Gen, a process that regenerates post-production waste, broken pieces, and shards of porcelain into new porcelain. The waste is collected and funneled back into production, turned to dust using new techniques, and refashioned into brand new raw materials.
